SORIN BADEA
Web Developer

PROFILE

As a web developer, I am passionate about creating innovative solutions using a variety of technologies. With experience in HTML, CSS, JavaScript, and other frameworks such as React and Vue.js, I am constantly seeking opportunities to expand my skillset and stay up-to-date with the latest trends in web development. I am excited to continue my career in web development and to contribute to a dynamic and collaborative team.

WORK EXPERIENCE

Qualysoft – IBM projects
Web Developer
July 2021 – August 2022

Mater Private Network - Private Hospital

- ❖ I was involved in the development of a web-based platform for a private hospital located in Dublin. Primarily, I worked on the front-end development of the platform using HTML, CSS, and JavaScript. Afterward, I integrated the code into Microsoft Dynamics using custom templates.
- ❖ The UI was split into two parts, one accessible by patients and the other only by medical staff.
- ❖ All pages were made fully responsive from 280 pixels according to an established design made in Figma.
- ❖ During my free time, I learned the React.js fundamentals and I was also drawn to UI/UX concepts.

Autogrill - Multinational Company

- ❖ I worked on a web application project for a food services company. The project was built on the server-side, and we used technologies such as HTML, CSS, JavaScript, and Python, along with Django.
- ❖ My role in the project was primarily focused on the front-end part, which involved building the page elements by extracting data from the back-end and creating fully responsive web pages according to design.
- ❖ I also contributed to the customer loyalty system by creating a graphical representation of the points that customers could collect from previous purchases.
- ❖ Workflow tools that we used are Git, SourceTree, Trello, and Zeppelin.

Wolf Digital Media
Web Developer
August 2020 – July 2021

- ❖ I created fully responsive websites from given designs, using the "mobile first" approach and other design methods and concepts. I worked mostly with WordPress, HTML5, CSS3, Bootstrap, JavaScript, and Vue.js.
- ❖ To ensure the quality and accessibility of the pages, I developed a strong interest in UI/UX patterns.
- ❖ Workflow tools that I used are Git, Bitbucket, Jira, and Adobe XD.

Ajusto – 2021

- ❖ I worked on a home services web platform that facilitated the connection between handymen and customers. The application was developed in WordPress, using custom templates created with HTML, CSS, and JavaScript.

Doctor Swiss – 2020

- ❖ I worked on a web platform that presented smart health-care products. We developed a single page application for product presentation, using Vue.js framework. The structure and style of the platform were built using HTML and CSS, and we ensured responsiveness using Bootstrap with "mobile first" approach.

Freelancer
Web Developer
March 2019 – September 2020

- ❖ I learned web development fundamentals working with HTML5, CSS3 (including responsive design using Flexbox and CSS Grid), and became familiar with Bootstrap and Skeleton.
- ❖ I gained experience in JavaScript (ES5, ES6+), including Data Types, Functions, Loops, DOM Manipulation, Local/Session Storage, OOP, Promises, Async/Await, REST APIs, and HTTP Requests.
- ❖ I putted my knowledge into practice by working on small projects for friends and acquaintances, helping them promote their businesses by creating webpages to increasing their visibility in online.

EDUCATION

Dimitrie Cantemir University
Bachelor's Degree: Economic Science

- ❖ Goods/ services trading
- ❖ Management of the relation with clients and suppliers
- ❖ Management and supply of material and financial resources
- ❖ Quality assurance
